I'm a Biomedical Engineer and also a Software engineer from Moringa School bootcamp program which has made it possible to gain a thorough understanding of Software Engineering principals. Due to my passion for programming,I have a strong foundation in software development, with experience in programming languages such, Html, Css, JavaScript, Python, SQL and frameworks like React.js, Flask.py. I have successfully worked on various projects, including Asset inventory management system (Properties), which has enhanced my problem-solving skills and understanding of software design principles.

- Any other duties assigned to do.

EDUCATION

2024

Boot-camp Program Software Engineering
Moringa School, Nairobi

2022

Pass Biomedical/Medical Engineering
Kenya Medical Training Collage (KMTC), Loitokitok
• Diploma in Biomedical/Medical Engineering

2019

Pass Biomedical/Medical Engineering
Kenya Medical Training Collage (KMTC), Loitokitok
• Certificate of Biomedical/Medical Engineering

2016

C Secondary education
Segero Heralds Adventist High School, Uasin Gishu
County
• Kenya Secondary School Education

2012

310 Primary education
Emdin Primary School, Nandi County
• Kenya Primary Education

HOBBIES AND INTERESTS

- Software Design
- IOT Development
- Reading Journals
- Hackathons
- puzzle solving
